

Umbrelly

Privacy-first classroom monitoring and student safety for
K-12 schools

INVESTOR PRESENTATION • Q2 2026

Schools are flying blind on student safety

No visibility during class time

Teachers manage 25+ students on devices with zero insight into what's on their screens. Harmful content goes undetected until it's too late.

73%

of teachers say they cannot see what students do on devices during class

Privacy concerns block adoption

Existing tools monitor 24/7 with no boundaries. Parents distrust always-on surveillance. Schools face FERPA/COPPA compliance risks.

Fragmented, outdated tooling

Districts juggle 3-5 separate tools for monitoring, filtering, wellness, and SIS integration. Legacy software built on decade-old architectures.

45%

of parents worry about always-on school monitoring tools

\$2.1B

annual K-12 spend on fragmented safety and filtering tools

OUR SOLUTION

Session-based monitoring that respects privacy

Active Session Only

Monitoring activates only during class sessions. No 24/7 surveillance. Full audit trail of every capture.

AI-Powered Safety

Claude AI detects harmful content, cyberbullying patterns, and student wellness signals in real-time.

Smart Filtering

Context-aware web filtering that adapts to lesson plans. Auto-switches policies between school and home.

Role-Based Access

Six distinct roles (teacher, admin, parent, student, IT, super admin) each see only what they need.

FERPA/COPPA Compliant

Built from day one for education privacy laws. Data minimization, parental consent flows, secure storage.

SIS Integration

Plug into Google Classroom, Clever, ClassLink, and PowerSchool. Zero manual class roster management.

Privacy-First

FERPA Compliant

AI-Powered

Real-Time

Built for the modern classroom

Student 9

Real-time screen grid

Teachers see every student screen in a live grid. Configurable capture intervals from 3-30 seconds.

AI flag alerts

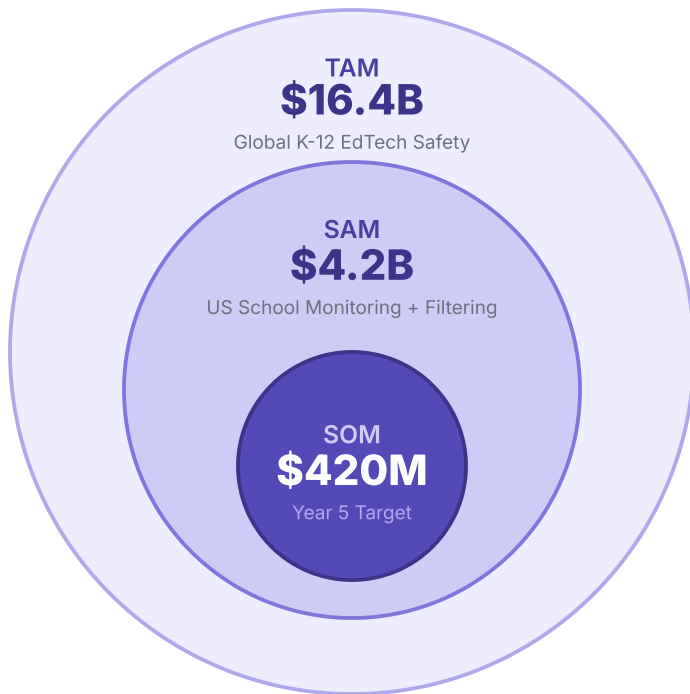

Harmful content, off-task behavior, and wellness concerns are flagged instantly with severity levels.

Browser extension

Lightweight Chrome/Edge extension. Manifest V3. Zero student-visible overhead.

MARKET OPPORTUNITY

A \$16B+ addressable market

130,000+ K-12 schools in the US alone, each spending **\$5-15 per student/year** on monitoring and safety tools.

18% CAGR

K-12 digital safety market growth through 2030

55M

US K-12 students using school-issued devices daily

\$8-12

Average per-student annual spend on monitoring/filtering

Umbrelly is the only privacy-first, AI-native platform with full feature parity.

Per-student SaaS with district-level contracts

\$8 /student/year

Essential

Monitoring + filtering + basic alerts.
Ideal for small schools.

90%+ Gross Margin

Pure SaaS with minimal per-student infrastructure cost

\$12 /student/year

Professional MOST POPULAR

+ AI wellness detection + parent portal + advanced reports.
District-level contracts.

115% NDR Target

Expand via tier upgrades and district-wide rollout from pilot schools

\$18 /student/year

Enterprise

+ SSO, custom SIS, dedicated CSM, SLA.
Large districts and state deployments.

3-Year Contracts

District procurement cycles favor multi-year commitments

Go-to-market: Land with a pilot school (free 60-day trial), expand to district-wide contract. Partner with SIS vendors (Clever, ClassLink) for distribution. Target E-Rate funding eligibility.

Phase 1 complete. Shipping fast.
